realistic design problems, and referring back to these cases at the end of each chapter. Throughout, the author uses shortcut techniques that allow engineers to obtain the whole focus for a design in a very short period (generally less than two days). Machine derived contents note: Part I A Strategy For Process Synthesis and Analysis Conceptual design of chemical processes / James M. Douglas ... - Process Design is the "capstone" course in the chemical engineering curriculum. It used to be divided into Equipment Design and Plant Design. With the publication of Rudd and Watson's "Process Engineering Strategy" in 1968, it was recognized that it's principles can be taught

and not "just has to be learned later" by a chemical engineer in his career.
